

SIMPLY THE MOST DIVERSE CIVIL CONSTRUCTION COMPANY IN AUSTRALIA

HYDRO EXCAVATIONS

Hydro excavation is a revolutionary non-mechanical and non-destructive process which combines

pressurized water and a high flow of moving air to simultaneously excavate and evacuate native soils at a controlled rate.

Breakthrough have a fleet of 'Hydrovacs' across the company and can service any size commercial or residential project.

Possible applications of the hydrovac include:

- Replacement of pipes and fittings
- Renovation and new installation of gas-, water-, heating pipes, cables and disposal lines
- Exploratory excavations
- Railway trackside maintenance and repair
- Clearing away environmental damage
- Replacement of contaminated soil around the roots of trees
- Removal of material in demolition projects
- Cleaning blocked street gutters & gullies
- Leaf removal
- Application for special operations

SERVICING COMMERCIAL, INDUSTRIAL AND RESIDENTIAL CLIENTS ALIKE IN REGIONAL AND METROPOLITAN AREAS OF QUEENSLAND, THE NORTHERN TERRITORY AND THE ACT WITH AN ADVANCED FLEET OF CONCRETE CUTTING AND DEMOLITION EQUIPMENT.

Our adage has always been and remains the same; we offer solutions and we work anywhere anytime.

Our knowledge and expertise with concrete cutting, demolition and asbestos removal methodology is unsurpassed with over 25 years experience in the industry.
